

# Self-nomination form

For the election to the board of Low Carbon Gordano Limited at the AGM  
on Tuesday 27 September 2016

Under LCG' s rules a third of the elected directors must retire each year. This year Rob Lamoon and Ervin Bossanyi will be standing down and both have indicated that they will be standing for re-election.

All members are entitled to stand for election. If you would like more information about the role of Director please refer to the document 'AGM 2016 LCG Board member job profile' available from our website.

If you would like to be considered for this role at the AGM then please supply the following information to David Bunker, Society Secretary, Low Carbon Gordano, by email to: [david.bunker@mongoose.energy](mailto:david.bunker@mongoose.energy)

or by post to: 13/14 Orchard Street, Bristol, BS1 5EH

to arrive by Monday 5<sup>th</sup> September 2015.

NAME: Ervin Bossanyi

Please give your reasons why you want to join the Board and what skills/expertise you would bring to the team. Feel free to attach an extra sheet if needed.

I first joined the Board to represent Sustainable Backwell, where I had been leading the energy group and investigating the possibilities for a community wind turbine project and a solar farm. It clearly made sense to join forces with LCG to have a higher chance of succeeding with community energy projects.

Professionally I have been working in wind energy research and development since 1978, and have seen wind energy grow from almost nothing to a major global industry. I moved to Backwell in 1994 to join the renewable energy consultancy Garrad Hassan. This has since become part of DNV GL, where I am now Senior Principal Engineer for strategic research in renewables and part-time honorary professor at Bristol University.

I have been impressed by the potential of the community cooperative model in promoting renewable energy projects as well as in increasing awareness amongst the public. I am keen to continue as a Board member, to help maintain two-way links with my industrial and academic colleagues as well as my local community, to provide technical expertise where needed and to spread the positive message about community energy.
