NAME: Rob Lamoon

Please give your reasons why you want to join the Board and what skills/expertise you would bring to the team. Feel free to attach an extra sheet if needed.

I am a project manager, specializing in electronic packaging of low power semiconductors. I have a background in material science and process engineering.

On moving to Portishead in 2008, I started my own energy consultancy company to promote energy saving techniques to businesses and encourage them to focus on energy efficiency with the added benefit of lowering their carbon footprint to help the environment.

I have enjoyed working as a board member for the last four years and would like to continue to support the board going forward as we enter new exciting times for community energy.
